# Tomiwa Ogunrinde

I make awesome websites that promotes business and brands  
Lagos

## Summary

I add value to life and business by designing and developing websites that promote brands, grow business and help them standout. From homepages, magazine, E-commerce, blogs, portfolio, landing pages, social media websites and directory/contact pages websites.

My journey into Front-End Development began with experimenting with designs in CorelDRAW and Photoshop, then I realised that with some lines of codes I could add life to my designs and make web pages, I took up the new challenge and I have been hooked ever since.
